

Senior game programmer at Multiverse ApS

Multiverse ApS is a game company located in Copenhagen, Denmark. We are developing a user created games platform called [KoGaMa](#).

- KoGaMa is a website where users can create, share and play games
- Creating and playing are enhanced by social features and multiplayer
- Games are frictionlessly shareable across the internet

We are one of the best companies in the world to combine web and games development. The result: We are enabling anyone to create games for everyone.

Currently, KoGaMa has 18 million users and they have created more than 3 million games.

The Team

The Multiverse team is a combination of young talent and veteran developers. The experience of the team ranges from AAA games such as Hitman and Max The Curse of Brotherhood to designing for Lego onto development of social media for children.

The team is uniquely skilled at utilizing the very best practices for delivering web content in terms of low friction, sharing and accessibility. The game development expertise of the team is used to create tools and game objects; enabling the KoGaMians to deliver fantastic multiplayer 3D games.

The Position

We are looking for a seasoned game developer with at least 3 years of Unity experience. You need to be self driven, willing to teach the junior programmers of the team the skills of the trade, and be able to create solutions which are both tailor made for the very best game play, while also maintaining and improving upon the KoGaMa framework.

An important part of the job will be to develop generic game play systems and create tools to enable the game dev. team to continuously work more efficient.

The Requirements

- Strong math and physics skills
- Passionate and skilled regarding OO in C#
- Optimization expertise
- Experience with developing tools

The nice to haves

- Experience with very limited platforms such as WebGL or mobile
- Shader programming experience
- Experience with multiplayer games
